MAKES STOMACHS FEEL FINE  
Dyspepsia, Indigestion, Sourness,  
Gas and Stomach Misery Vanishes.

Nothing will remain undigested or sour on your stomach if you will take a little Diapiesin occasionally. This powerful digestive and antacid, though as harmless and pleasant as candy, will digest and prepare for assimilation into the blood all the food you can eat.

Eat what your stomach craves, without the slightest fear of indigestion or that you will be bothered with sour risings, belching, gas on stomach, heartburn, headache or water brash or a feeling like you had swallowed a lump of lead, or other disagreeable miseries. Should you be suffering now from any stomach disorder you can get relief within five minutes.

If you get from your pharmacist a 10-cent case of Pape's Diapiesin you could always go to the table with a hearty appetite, and your meals would taste good, because you would know there would be no indigestion or sleepless nights or headache or stomach misery all the next day; and, besides, you would not need laxatives or liver pills to keep your stomach and bowels clean and fresh.

Pape's Diapiesin can be obtained from your druggist, and contains more than sufficient to thoroughly cure the worst case of indigestion or dyspepsia. There is nothing better for gas on the stomach or sour odors from the stomach or to cure a stomach headache. You couldn't keep a handier or more useful article in the house.

## RAILROAD NEWS.

Very Little Encouragement in Western Rail Business.

Railway Officials in Topeka Are Still Doubtful.

LOOK FOR BETTER DAYS

Government Litigation Has Worried Traffic Men.

Other Items of General Interest in Traffic World.

Officials of the Santa Fe and Rock Island Lines in Topeka see very little improvement in railway business in the west. In fact the October earnings made such a small gain over the gains of the last few months that the traffic men shake their heads in doubt.

Not that the Rock Island and Santa Fe men are discouraged—far from that. They have faith in the country and in a return of good times and financial confidence. But right in the middle of what should be a big increase of fall trade, they are witnessing a sharp downward in all lines of development.

While there has been no noticeable improvement in the railway situation they are encouraged over the fact that the late earnings have not fallen below the recent low level in all business interests. They are firm believers in the statements that "nothing lasts forever."

The belief among traffic students that the government will not push its litigation against the trusts and that the stability in the aggregate amount of business will remain, has placed a brighter light on the present financial situation.

The New York Evening Post in summing up the business in the west through its Chicago representatives has the following to say on western business:

"The coming political situation is not receiving the attention it should at this time, and to a certain extent these factors are said to have been at least partially discounted. Money rates throughout the west remain easy, and mercantile and other interests find it easy to meet their requirements at this time, but banking interests are of the opinion that money will be firmer shortly after the first of the coming year."

In the dry goods trade there was a little less buying in most lines than for some time, and road orders were reported as slightly below those of a year ago. The movement of coal was restricted somewhat because of the irregularity of the car supply. Groceries were in reasonable demand.

"The surplus and shortage figures reported for the period ending October 25, show a surplus of 29,300 cars, and a shortage of 18,774 cars, leaving a net surplus of 10,526 cars."

"While receipts of grain at Chicago decreased 244,000 bushels, or 5.8 per cent from the previous week, they were 338,000 bushels, or 8 per cent in excess of last year, and 738,000 bushels, or 20.3 per cent in excess of the five-year average."

"Deliveries of grain by the Northwestern constituted 20 per cent of the aggregate, while the Great Western and Burlington each had 14.7 per cent, the Santa Fe and Rock Island 12 per cent each, the Illinois Central 7 per cent, the Eastern Illinois 6 per cent, the Alton 4 per cent, and the Wabash and Santa Fe 5 per cent each."

FLOUR DEMAND IS SLOW.

Reduced Prices Failed to Stimulate Railroad Traffic.

Chicago, Nov. 10.—Wheat futures suffered a sharp decline the past week, which served to unsettle the flour market, and while prices were reduced, it failed to stimulate buying by distillers to a great extent, and from the amount of flour delivered at Chicago the past few months it would seem as if local stocks were light. The past week showed a decrease of 2,963 barrels in deliveries here, and as compared with last year a decrease of 40,604 barrels, and the aggregate movement was the smallest at this season in some years. The Burlington made the best showing for the week, increasing its delivery 7,509 barrels over the previous week, while the Santa Fe increased 1,487 barrels, the Great Western, 4,275 barrels by the Northwestern, 3,675 barrels by the Rock Island and 1,918 by the Santa Fe. As compared with last year, the Rock Island increased 1,191 barrels, while decreases were 20,811 barrels by the Santa Fe, 5,500 barrels by the Soo, 4,050 barrels by the Northwestern, 3,675 barrels by the Great Western and 1,974 barrels by the Burlington. Shipments of flour from Minneapolis the past week were 347,620 barrels, compared with 348,987 barrels the previous week and 317,285 barrels last year.

INTERNATIONAL RATE BUREAU

Negotiations for Regulation of Canadian-American Rates.

Ottawa, Ont., Nov. 10.—The negotiations for establishing an international commission to regulate freight and passenger rates between Canada and the United States, which were begun last year here and in Washington, will be resumed this winter. Frank Cochran, minister of railways, will take up the matter with the United States government soon after parliament meets next week.

"Such a commission," declares Judge Mabey, chairman of the Canadian Railway commission, "is absolutely necessary if we are to have any control over the railways in respect of the through traffic."

It is understood here that Mr. Prouty of the United States Interstate Commerce commission has formulated a plan for the international commission and has submitted it to Prime Minister Borden.

SEARCHLIGHT A PROTECTION.

American Locomotive Co. Cures for Strike Breakers in Schoenectady.

Schoenectady, N. Y., Nov. 10.—Three carloads of strike-breakers who began work yesterday in the boiler shops of the American Locomotive company's plant here, where 1,000 boilermakers and helpers have been on strike for two weeks, are today under the protection of armed guards. Two powerful searchlights are being operated at night from the top of high buildings and a 20-foot fence has been erected about the shops. The strike-breakers are being housed and fed within the plant.

The boilermakers went out when they were asked to work on New York Cen-

tral engines. They stated that as long as the New York Central boilermakers were on strike, they would not work. An official of the company says that more strike-breakers would be brought in as needed until all the vacancies had been filled.

GETTING CLOSER TO PEOPLE.

Burlington Officials Try Harmony Methods in Leavenworth.

Leavenworth, Kan., Nov. 10.—To get better acquainted is said to have been the sole object of a visit to Leavenworth by W. A. Lalor of St. Louis, assistant general passenger agent, A. L. West of St. Joseph, assistant general freight agent, William Gray of St.

Louis, general freight agent and Harry E. Heller of Kansas City, Mo., general agent of the Burlington railroad. The four devoted the day to meeting many of the larger shippers, becoming acquainted with those whom they had not previously met and looking over the city in general.

Asked what was the meaning of the visit Mr. Lalor said: "To get closer to the people, the great American people, many of the best of which I know to live in Leavenworth. Our coming has absolutely no other significance."

"Getting closer to the people" is a popular pastime with railroad officials nowadays and the officials of all the enterprising lines in this part of the country are making a systematic can-

vass of their territory. In their visits they meet not only their own employees but also the people with whom they do business.

RAILWAY NOTES.

The locomotive pictured in the State Journal last evening was the first in the world to be equipped with an external throttle. This throttle is the invention of W. F. Buck, superintendent of motive power of the Santa Fe.

C. W. Kouns, general manager of the eastern lines of the Santa Fe, with headquarters at Topeka, is on the Missouri lines on an inspection trip.

An increase in wages approximating 6 per cent, reduced working hours and the sharing of a lump sum of \$75,000,

have been granted to the Baltimore & Ohio and the Baltimore & Ohio Southwestern railway telegraphers.

The car men employed on the Shreveport division of the Missouri, Kansas & Texas, who went out on strike with the other car men on the "Katy" system some time since, have gone back to work. A report from Hughes Springs to that effect was confirmed by any point on the system.

Although the Western Passenger association has refused to make special rates for the National Western Stock association or for the Christmas holidays, it has made a special rate for the National Wool Growers' association,

which will hold its forty-eighth annual convention in Omaha, December 14 to 16. A 1-cent rate has been made in each direction in the western territory.

At a meeting of the Central Passenger association it was decided not to grant any special fares in the association's territory for Thanksgiving, Christmas and New Year. Similar action was taken by the Western Passenger association recently.

That all railroads adopt uniform lighting and heating facilities, so that the interchange of cars may be made more effective and repairs expedited, was urged by D. J. Cartwright of South Bethlehem, Pa., at the session of the fourth annual convention of the Association of Railway Electrical Engineers.

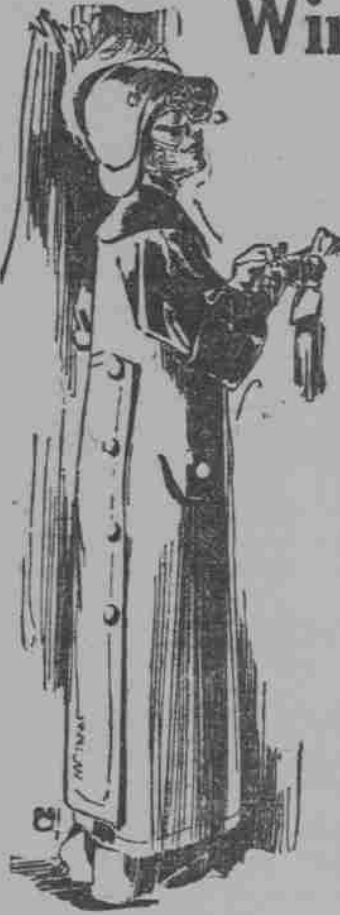

THE PAXTON & PAXTON STORE

THE PAXTON & PAXTON STORE

THE PAXTON & PAXTON STORE

Women's and Misses' Wearing Apparel specially priced for today and tomorrow. Low prices on Underwear and Hosiery. Big reductions on Men's and Youths' Fine Clothing. Every section of this great store is ready to prove you will be financially benefitted by our Low Cash Prices.
